

SERENITY in BURNT CHIMNEY

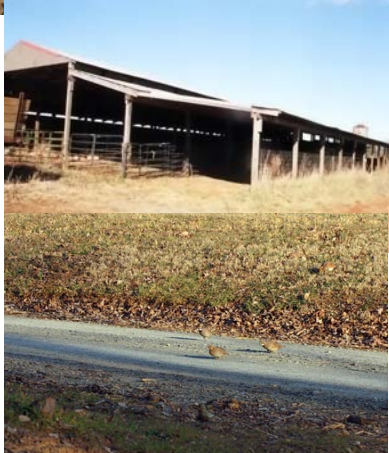

Our animal friends are losing the battle. Their forests, their homes and their lives are being sacrificed in the name of progress and housing for the many. If we don't put aside large acreage now, placed under the care of self-appointed "guardians", we won't have any forests left for homes and shelter for them or for us.

Out of respect for the Earth and it's Animals:

This beautiful land is available and subdivides into 15 acre tracks or larger, depending upon the lay of the land. These parcels cannot be further subdivided. In this small way we hope to be able to assist our animal friends by preserving the land and woods in large clusters. We then seek to find those who will accept these responsibilities with joy.

Living in Peace and Harmony with nature, is keeping balance.

Land Development the Harmonious Way.
